Thanks for purchasing
The Dog Track
by SageKing.

Before you begin make
sure you have all of the
items in the parts list.
Follow the instructions
below and begin to enjoy
the benefits of this
Quality Product.

A) Track

B) Stake

C) End Stop

D) Bolt
4 - LONG
8 - SHORT

E) Connector

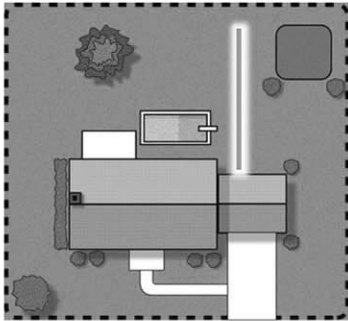

F) Slider with
Lead

NOTE: For use with dogs 85 pounds or less!
NOTE: Not for use in sandy soil!

Easy Assembly Instructions:

Tools Needed: Hammer and
Phillips Head Screw Driver.

1. Layout the straight sections of track (A) in the
area you would like the dog track set up.
Begin at the first section of track (A).

2. Join Connector under track.
Using two **LONG** bolts (D)
provided screw the end stop (C) to
the end of the track.

3. Slide the sliding mechanism
(F) onto the opposite side of the
track.

4. Lay the track (A) in the
position you want and drive a
stake (B) through the first
connector (E).

5. Screw a connector (E) to the
other end of the track using the
provided **SHORT** bolts (D).

6. Drive the next stake (B)
through the connector (E).
(Drive the stakes flush with
each connector base)

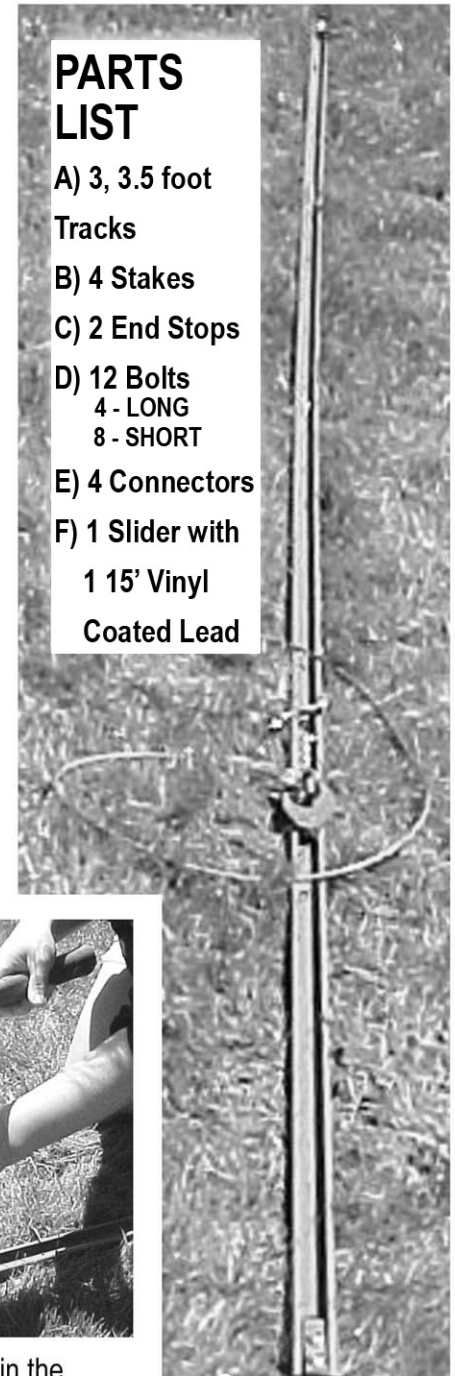

7. Connect the next section of
track to the connector. Continue
this process for the remaining
sections.

8. Attach the other end stop
(C) to the last section of
track the same as the first
end stop was installed.
